

JPMORGAN CHASE & CO.

Data Analyst - Fresher

Job Title	Data Analyst - Fresher
Experience	0-1 Year / Freshers
Employment Type	Full-Time
Location	Pan India / As per Business Requirement

About the Role

We are looking for motivated and analytical Data Analyst Freshers to join a high-performing analytics environment. The selected candidates will work with business and technology teams to analyze data, generate actionable insights, prepare reports and dashboards, and support data-driven decision-making. This opportunity is suitable for recent graduates who have strong analytical skills and a good understanding of SQL, Excel, Python, statistics, data visualization, and business analytics.

Key Responsibilities

- Collect, clean, validate, and analyze structured and unstructured datasets.
- Write SQL queries to extract and manipulate data from databases.
- Perform data quality checks and identify inconsistencies, missing values, and anomalies.
- Analyze datasets to identify trends, patterns, and business insights.
- Develop and maintain reports and interactive dashboards using Power BI / Tableau.
- Use Excel for data analysis, reporting, pivot tables, lookups, and data visualization.
- Apply basic statistical techniques to support business analysis.
- Work with Python for data cleaning, transformation, and exploratory data analysis.
- Prepare daily, weekly, and monthly analytical reports.
- Translate business requirements into meaningful analytical outputs.
- Collaborate with business, technology, risk, operations, and other stakeholders.
- Document analysis methodologies, assumptions, findings, and recommendations.
- Support automation and process-improvement initiatives.
- Maintain data confidentiality and follow organizational data governance and security standards.

Required Technical Skills

- SQL - Queries, Joins, Subqueries, CTEs, Aggregations, Window Functions
- Microsoft Excel - Pivot Tables, VLOOKUP/XLOOKUP, INDEX-MATCH, Charts, Conditional Formatting
- Python - Pandas, NumPy, Matplotlib/Seaborn
- Statistics - Descriptive statistics, probability fundamentals, correlation, regression basics
- Data Visualization - Power BI or Tableau
- Data Cleaning & Data Preparation
- Exploratory Data Analysis (EDA)
- Basic Database Concepts
- Business & Analytical Problem Solving

Good to Have

- Knowledge of ETL/ELT concepts
- Basic understanding of cloud platforms such as AWS, Azure, or GCP
- Knowledge of data warehousing concepts
- Familiarity with Git/GitHub
- Basic understanding of financial services or banking data
- Knowledge of AI/ML fundamentals

Educational Qualification

- Bachelor's or Master's degree in B.Tech / B.E., B.Sc., BCA / MCA, M.Sc., Statistics, Mathematics, Computer Science, Information Technology, Data Science, Economics, Business Analytics, or other relevant quantitative disciplines.

Eligibility

- Fresh graduates and candidates with 0-1 year of experience can apply.
- Strong analytical and logical reasoning abilities.
- Good communication and presentation skills.
- Strong willingness to learn and work with large datasets.
- Candidates should be comfortable working with SQL and Excel.
- Academic projects, internships, certifications, or practical projects in Data Analytics are an advantage.

Preferred Certifications

- Microsoft Power BI Data Analyst
- Google Data Analytics Professional Certificate
- IBM Data Analyst Professional Certificate
- SQL Certification
- Tableau Certification
- Python for Data Analytics Certification

Key Competencies

- Analytical Thinking
- Problem Solving
- Attention to Detail
- Data Interpretation
- Business Acumen
- Communication Skills
- Stakeholder Management
- Team Collaboration
- Time Management
- Continuous Learning

Career Growth

Data Analyst -> Senior Data Analyst -> Business/Data Analytics Specialist -> Analytics Manager. Candidates may also progress into Data Science, Business Intelligence, Risk Analytics, Product Analytics, or Data Engineering depending on performance and skill development.

Selection Process

1. Student list received from the institution
2. Profile shortlisting based on eligibility and role requirements
3. Technical Assessment - SQL, Excel, Python and Data Analytics Fundamentals
4. Technical Interview
5. Group Discussion (GD)
6. HR Interview
7. Final Selection and Background Verification
